What is KRAMP Carbide EXPERT LINE?

- Carbide plates on the “chisel front” - 5-7 times longer service life.
- Selected steel unique forging and treatment process- high wear resistance.
- Special grooves on chisels - significantly limits the wear.
- Bolt protection by forged holes- high reliability.

Why you should use KRAMP Carbide EXPERT LINE?

- 5 to 7 times more work in the soil before you need to replace the parts.
 - ➔ Reduced down-time optimizes man-hours and efficiencies on farm.
- Constant work geometry – the chisel does not lose its original length ensuring the expected performance is maintained.
 - ➔ The whole field is tilled at one depth.
- Fuel consumption reduced thanks to a special architecture of the chisel.
 - ➔ Better soil flow reduce the energy needed for tilling.

Our range include parts fits to Horsch, Amazone, Kuhn, Agrisem, Kockerling, Vaderstad, Potinger and many more....
