SIMPLEX sledge hammer

Rubber with "Stand-Up" / superplastic; with cast iron housing and Hickory handle

3027.200

Offering an insert combination of rubber composition / superplastic, the SIMPLEX sledge hammers D60mm and D80mm are indispensable companions for a large number of applications. These top sellers made by Halder have now been developed further:

Boasting an ingenious shape, the rubber insert with “stand-up” (3202.2) allows the hammer to stand securely on its head and reduces the need to bend over, making it possible to work in a much more ergonomic and back-friendly manner. Ultra low-wear, impact cushioning and odourless, the proven rubber blend offers a much longer service life than a conventional rubber hammer.

The superplastic insert (series 3207) allows for a more powerful impact force than the rubber insert. It is a medium hard plastic insert made of extruded and extremely homogeneous material. Compared to injection moulded plastic inserts, it is therefore considerably more wear-resistant and durable.

Its 70cm hickory handle makes it possible to effortlessly grab the sledge hammer from a standing position.

Made of cast iron, the housing comes with an integrated handle protection sleeve that provides for a high level of break resistance.

In line with the smart SIMPLEX principle, all components are replaceable and can be retrofitted. This translates to savings in both money and resources.

This version is available in the size D60mm, D80mm and D100mm. Also with a short handle.

Product features

- Further development of Halder’s top seller: The rubber insert with “Stand-Up” (3202.2) combined with the 70cm handle ensures back-friendly working and reduces the need to bend over.
- SIMPLEX soft-face mallet with the insert combination of rubber composition (black, medium hard, impact cushioning, odourless, low-wear) / superplastic (white, medium hard, very durable).
- 70cm in length, the hickory handle can be easily grabbed from a standing position.
- Cast iron housing with integrated handle protection sleeve and excellent break resistance.
- All parts can be replaced / retrofitted, resulting in great savings in cost and resources.
- Available in sizes D60mm, D80mm and D100mm and with a short handle.

Application Areas

Gardening and landscaping, curbstone setting, setting L-stones, masonry and stair work, fence construction, driving steel wedges, scaffold construction, tent construction, carpenter's work, prefabricated house construction

This hammer features a special insert with "Stand-Up" that was incorporated into the housing.
