SIKA BUBBLE represents a new trend in work shoes. With its stylish design, SIKA BUBBLE erases the line between professional footwear and sneakers – without compromising on comfort or safety. Finally, a shoe you want to wear. All day long. The specially designed outsole is extra slip resistant and provides excellent grip on slippery surfaces. The air bubbles in the outsole also provide unique comfort and shock absorption under the entire foot, reducing the risk of knee, hip and back injury. The breathable, shock absorbent inlay sole reduces unpleasant odours and retains most of its shape over time. The shoes can be washed at 30 °C.

SIKA BUBBLE is available in 3 colours:

A black model supplied with an extra pair of blue shoelaces, a black/white model supplied with an extra pair of white shoelaces and a white model supplied with an extra pair of blue shoelaces

SIKA BUBBLE is developed and designed for both women and men.
