

radura®

Product Information

The new radura® **PrimeLine** straw chopper knife with wear protection coating

Durable. Self-sharpening. Precise.

Perfect Harvest.

Wear protection

- Extraordinarily long tool life
- Consistent cutting accuracy
- Convincing chopping quality

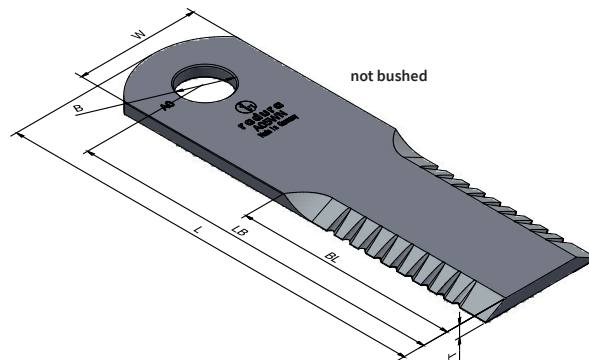

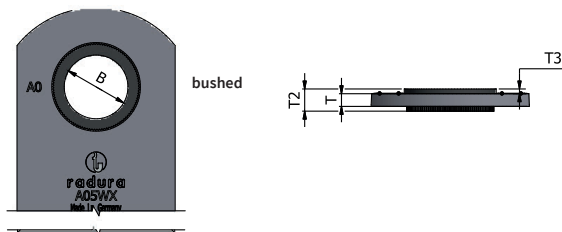

PrimeLine straw chopper knife with wear protection coating

The tungsten carbide coating ensures exceptionally high wear resistance and significantly extends the service life of the knife. This means that the cutting performance remains consistently high even under difficult conditions. Ideally suited for the use in straw choppers, it ensures clean and efficient shredding of straw, which improves soil distribution and accelerates rotting. Perfect for farmers who prioritize durability and precision.

- Coating of very hard, embedded tungsten carbide particles
- Applied by using laser cladding technology
- Consistently sharp blade keeps cutting precision and engine power constant, saves energy and minimizes fuel consumption
- Improved self-sharpening effect
- Very long service life compared to standard blades
- Carrier material wears out faster than coating, creation of a sharp cutting edge

Part no. radura PrimeLine	Serration	Bushed	Total length (L)	Width (W)	Thickness (T)	Depth with socket (T2)	Bushing protrusion (T3)	Bore diameter (B)	Bore spacing (LB)	Wading length (BL)	Suitable for radura BasicLine No.	Suitable for OEM ref. no.
