

# HOSE DROP SYSTEM 5S & 5SL

## Product info

**Version till 2019** with stainless steel dosing orifice (Standard)

Bayonet and hose nipple are connected by screwing, apparent at the hexagon nut

**New version „2020“** with plastic dosing orifice (ISO)

Bayonet and hose nipple is one unit, no nut

**Advantages:** Easy handling during mounting process, avoids wrong positioning of discs, higher stability, lower risk of leakage

**Conclusion:** The dosing systems are not compatible for both systems, the new system doesn't fit into the old version and reverse. For spare part issues check first the relevant system.

Answer to FAQ: What does **SL** mean? **L** is for Large rates **5S**: app. 50 – 280 l/ha,

**SL**: 250 – 550 l/ha
