Pattern Selection

Apply +Vdc to Yellow cable for 0.5 to 2 seconds which will cause the light to switch to the next pattern. Apply +Vdc to yellow for 2.5 seconds will cause the light to go back to the first pattern.

Synchronization

Note: All lighthoods to be grouped must first set at the same pattern before being linked together.

Wire:

Red: +

Yellow: (for changes of flashing mode / synchronous) +

White: (for alternate operation) +

Black: -
