LUDA FARM
www.luda.farm

Pre-Recording*

The FarmCam IP2 starts recording 3 seconds in advance before the event actually occurs in front of the camera. A valuable function if you want to catch a car that drives by or another fast-moving object you otherwise would have missed.

My.Luda.Farm

By being compatible with My.Luda.Farm, you can have the video from your camera in the same dashboard that you use to control other smart-farming products to monitor your electrical fence, remote switches, diesel tank, etc. The camera can e.g. interact with a remote switch (accessory), and when motion is detected on the courtyard, turn on a lamp in the kitchen to fool a diesel thief that someone is at home.

See what's happening on your Farm through Your Smartphone – wherever You are.

- Full HD image and sound
- Motion detection
- Night vision
- Recording*
- Made for outdoor use (IP66)
- Digital Zoom
- For mobile/tablet/PC

* To record you will need a SD card (purchased separately)

A Smart Wifi Camera for Your Smart Farm
