

ELEPHANTS TRUNK 3

NEW

COMPLETELY REDESIGNED

GTM Professional is proud to present the redesigned Elephants Trunk 3. The ergonomic harness that transfers the weight of the hedge trimmer, pole pruner, leaf blower or any other portable garden tool, from your arms and shoulders to your hips. The pulley has a pulling force of 3 kg.

With the introduction of the Elephants Trunk 3, GTM Professional offers even more comfort during hedge trimming, pruning or leaf-blowing. The redesigned harness can be extensively adjusted and offers extra support in the back thanks to the adjustable shoulder pad. The rod can be folded easily, making the harness compact to store or to take with you in the trunk of your car.

The adjustable straps on both the shoulders and the hips, and the adjustable length of the rod, make the harness suitable for every body type. Young or old, full or slim, we all have to take care of our body. The Elephants Trunk makes work a lot easier with less pain and much more efficiency.
