214B

Low profile mechanical suspension seat for light-duty applications

- EM9 + EM6 Compact Excavators, Pavers, Crawler-Dumpers, Skid-Steers
- IT1 Material Handling
- Light-duty Agriculture
- Inshore Marine

214B

214B is our latest suspension seat for light duty applications in EM6/EM9 small construction, IT1 mechanical handling, small agricultural machinery and marine (inshore) craft.

The second-generation iteration of the 200-series range, 214B offers excellence in manufacturing from KAB-CVG along with class-leading commercials in addition to a simple, ergonomic and functional design.

Already in use with Global OE's, 214B is a key offering in the original fitment and aftermarket conversion sectors across numerous applications.

Full details and performance specifications, ordering part numbers and spares parts list follow in this document, providing a complete view of this latest product launch.

For full specifications and pricing please contact your Account Manager or Customer Services Representative who will be pleased to assist you with your purchase of **KAB SEATING 214B**
