

# SP66® UNDULATED

Patented and approved by major battery machine manufacturers!

- The only trimmer line developed specifically for battery machines: makes your battery last longer!
- **Patented** raw material blend – Hard wearing, high melting point that eliminates welding in the head.
- A shaping process that is unique in the industry giving an aerodynamic profile with less air resistance and more stability, giving longer battery run time!
- Superior resistance to abrasion and eyelet wear.
- Adapted for all types of user.
  - Excellent aerodynamic properties!
    - Very stable!
    - Less effort required to cut!
      - Greater durability!
    - Reduced decibel emissions!
