

Tapered roller bearings for agricultural applications

**AGRI-
OPTIMIZED
DESIGN**

Agricultural bearings need to perform reliably all year round and withstand even the harshest operating conditions.

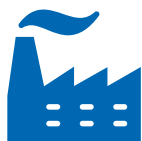

That's why SKF has extended its product range with a tapered roller bearing designed specifically for agricultural applications – one which has been tested and proven by agricultural OEMs for years.

Now being launched in the aftermarket, this agri-optimized tapered roller bearing features a fit-for-purpose design and is suitable for most farming applications with moderate loading capacity or limited axial load.

This new offer comprises:

- Metric and inch dimensions
- Outer diameter up to 220 mm
- Around 200 part numbers to be continuously extended
- Agri-tailored material composition

Manufactured in accordance with IATF 16949.

**Decades of
industry expertise**

**Design proven
by leading agri OEMs**

**Enhanced operational
reliability**

Where can it be used?

SKF tapered roller bearings for agricultural applications are interchangeable with standard off-the-shelf solutions and can be used in areas such as:

- small and medium tractor wheel ends and differentials
- tillage, seeding, and hay tool attachment wheels
- tillage discs and disc ploughs
- agricultural trailer wheels

For critical high-speed and high-load applications, such as tractor transmission or differential pinion, we recommend the SKF Explorer range. If you need assistance in choosing the proper bearing for your application, please contact an SKF sales representative or an authorized dealer in your country.
